CLIENT CONSULTATION AND MEDICAL HEALTH FORM FOR MICROBLADING

What are the main concerns relating to your eyebrows?

What would you like to improve? (Think about shape, color, density, thickness of your perfect brow)

FOR THERAPIST USE: (Note Pigments, blades, techniques to be used for the client)

**PLEASE READ THE FOLLOWING STATEMENTS CAREFULLY:** Microblading is a way of cosmetic tattooing. Re-touch procedures may be required. A healing period of 4 weeks is required before a touch up procedure can be performed. On a rare occasion, the pigment may migrate under the skin. Procedure of microblading may be slightly uncomfortable. The pigments will fade. Although extremely rare, there might be an immediate or develop an allergic reaction to pigment. Allergic reactions to anesthetic can occur. Permanent cosmetics cannot be applied to pregnant women or nursing mother. Permanent cosmetics cannot be applied to any person under the age of 18. Infections can occur if aftercare instructions are not followed correctly. There may be swelling and redness following the procedure. You may experience minor bleeding. If you have an MRI scan within 3 months after microblading procedure, you should notify/discuss with your doctor. Possible scarring may occur, but is extremely rare.

I have received an aftercare leaflet and I'm fully aware of the after care procedures: YES / NO

I have fully understood the information provided above.

I can confirm that all of the information provided by me, is correct and truthful.
